Project Training

- 1) iFinder: is a new search engine designed to provide fast and accurate search results. It uses smart technology to understand what users are looking for and delivers the best answers quickly. A key feature of iFinder is its strong support for the Khmer language, making it our top priority. This focus ensures that Cambodian students can easily find resources in Khmer.

Responsibilities:

- UX / UI Design
- Profile Tracking
- Tap News
- Results Searching

- 2) NormPloy: is a career and major consultant platform for everyone whether you're a high school student exploring future possibilities, a university student refining your choices, or a working professional seeking a career that truly matches your talents. *By combining insightful assessments with AI-driven recommendations and detailed guides.*

Responsibilities:

- Perform data Collection and data Cleaning
- UX / UI Design
- Bookmarks
- University Tracking
- Jobs Tracking
